DESCRIPTION:

KASTER - ERYD 40 xsm, the new model in the ERYD range, has been designed to comply with IRC and ORC regulations.

The hull has been carefully crafted using the most advanced VPP and CFD (computational fluid dynamics) methods to ensure balanced and high-performance sailing, both in windward/leeward and coastal races.

This racing version, with tiller and double steering wheels, can be converted into a performance cruiser.

The interior offers a spacious dinette and six berths, with a walk-through galley and a head to starboard.

Her meticulous construction employs unidirectional and biaxial fibreglass sandwich fabrics, with Corecell and epoxy resin.

The mast, boom, and bowsprit are made of carbon fibre.

This distinctive design provides the entire boat with superior structural rigidity while reducing weight.

- Lightweight composite hull
- Carbon mast, boom and bowsprit
- Complete sail wardrobe, used for only one season.
- Exchanges for performance boats considered
- Possibility of converting into a performance cruiser
- Viewable out of the water.
